A TIDBIT ABOUT THE DRILLING & EXCAVATING INC. DIVISION

The experienced team of Northern Plains Drilling & Excavating can provide a full range of geothermal well drilling and loops systems installation. We warranty all our wells, materials and workmanship for 1 year upon completion of the system. Give **Gardell** a call and see what **Northern Plains Drilling & Excavating** can provide for you, (701) 222-2155.

CHECK US OUT ONLINE

Did you know that you can find us in six different places on the web?!? In addition to our website, we have pages on Facebook, Twitter, Instagram, Pinterest and Houzz. On these pages you can find lists of services we provide, pictures of our work, updates on our business as well as fun links and information. Find us online and stay in the loop with **Northern Plains Plumbing, Heating & Air!**

"THINK CLEAN" TOILETS

Today toilets are being designed to look clean and flush clean because your bathroom can never be too clean!

- **Clean Functionality**—Companies like Kohler have been adding motion technology to their toilets to provide touchless flushing. Simply swipe your hand by the sensor to activate the flushing system! Now you can eliminate the amount of germs you pick up or leave behind.
- **Clean Design**—Many toilets now have "concealed trapway" options to provide a clean & stylish look and they eliminate dust collection on open trapways. One of our favorite concealed toilets is the Cadet 3 from American Standard.
- **Clean Flush** — Flushing systems like Toto's Double Cyclone or American Standard's PowerWash use the power of gravity and water flow to provide a good clean flush every time. This can help prevent "double flushes" and extend the length of time between cleanings.

WORK WITH A PROFESSIONAL PLUMBER?

When it comes to investments and complex technology, we put our trust in reliable partners if we want our purchases to last longer. Consumer electronics and computers are not the only things that are now becoming more sophisticated and offer more than their predecessors did. Faucets, showers and concealed installation technology in the bathroom & kitchen are also being continually developed further and improved.

- Many manufacturers actually recommend installation by a professional plumber, especially with the constant new innovations in plumbing fixtures.
- Benefit from years of experience for everything from troubleshooting & repairs to consultation and planning for larger projects.
- Have access to tailor-made solutions and save yourself time. Most companies are willing to do the research for you for specific products & solutions to fit your individual needs.
- Building a relationship with a plumber or plumbing company can provide security for fast service in emergency situations.

Interested in working with us on your next project? Contact us at (701) 222-2155.

ADAM'S HVAC SERVICE TIP OF THE MONTH

Humidity takes a significant toll on an air conditioner. While it's tempting to give your air conditioner a rest on cool nights, watch the weather forecast before you decide to open the windows at night. If the next day is going to be hot again, keep the air conditioning on and the home closed through the night to keep the humidity out of the house. During peak cooling hours, solar heat gain can account for one-third of the load on your air conditioner. Close the drapes on the sunny side of your home while you are there, or close all window coverings if you are leaving for the day.

For more information contact Adam at 701-595-7167.
