ADAM'S HVAC SERVICE TIP OF THE MONTH

Indoor air quality is a very important aspect of our everyday health whether at work or home. With the upcoming winter months we have less fresh clean air in our homes and spend more time indoors. Sick home syndrome is a side effect from off gassing of products in your home and lack of fresh air.

Contact Adam to talk about healthy home options at 701-595-7167.

AIR OASIS

The Bi-Polar 2400 model uses cold plasma technology that splits water vapor into positive and negative ions that are discharged into the air. These ions attach themselves to allergens such as smoke, dust, pollen, dander, and much more. The particles continue to bond to each other until they are heavy enough to drop out of the air and collect in filters. The positive and negative ions attack odors and other contaminants and convert them into oxygen, water vapor, and carbon dioxide, neutralizing odors and greatly improving your Indoor Air Quality (IAQ). The Bi-Polar 2400 ionizer air purifier prevents allergens from reproducing by removing hydrogen and disrupting the DNA of the pathogen. As an added benefit, static electricity is quickly reduced!

CLEANER, FRESHER, INDOOR AIR!

Our all-new Air Knight IPG Air Purification System uses a unique new indoor air quality process to naturally generate ionic oxidizers that actively seek out and purify pollutants in the air and on surfaces.

Reduces bacteria, mold, viruses, odors, VOCs, smoke and more // new IPG technology // air and surface treatment // 24V operation // easy installation //

long life warranty

KITCHEN SINKS TO SUIT ANY STYLE

Granite kitchen sinks have been rising in popularity in the past few years. The option of having a quality colored kitchen sink is appealing to many homeowners. These sinks are made from 80%-85% crushed granite which makes them heat resistant, scratch resistant, stain resistant and easy to clean. There are many styles and colors to suit any design need. Two of our most popular kitchen sink brands are Elkay and Blanco.

Granite sinks by Elkay are super durable and come in many different colors. While the traditional double equal bowl style is one of the most popular, customers also like the option of a low divider or even one single sink bowl. All Elkay granite sink styles are available as undermount or top-mount.

Blanco granite sinks are available in some additional colors and styles that are not available from Elkay. Their sinks are also available as undermount or top-mount. A unique style for Blanco is their super single sink which features a single bowl with raised platform inside the sink for glass, utensils or a colander. Their multi-level sink featuring a drain board is also popular Blanco style.

Looking to update your kitchen sink? Call **Lori** or **Brittney** with **Bath and Kitchen Consulting & Design** at (701) 222-2155.

GET YOUR DISPOSAL READY FOR THE HOLIDAYS!

The garbage disposal can be a great kitchen appliance as long as it is well maintained. Try one (or more) of these methods to clean and freshen your disposal.

- ◇ Fill the disposal side of your sink part way with hot soapy water. Then run the disposal as when you pull the plug and drain the water out. This flushes the disposal with more force than water running from the faucet. It's also great to do this as preparations before any of the following methods.
- ◇ Put a few pieces of citrus peel through the disposal. The peel helps clean the blades while the citrus oils freshen.
- ◇ Run a handful of ice cubes through the disposal to remove gunk and sharpen blades. Variations are to use ice cubes made of vinegar or adding rock salt in your ice cubes.
- ◇ Sprinkle 1/4 to 1/2 a cup of baking soda into the disposal then pour in a cup of vinegar. Let the mixture bubble and sit for 5-10 minutes, then run hot or boiling water through the disposal while its running to clean & deodorize.
